Date of birth

05 May 2002

Nationality

Croatian

ABOUT ME

- I am a fifth-year Computer Science student at FESB. For the past 6 months, I've been developing a mobile app in React Native: [Lazy Calorie Tracker](#) - it is available on the Google Play Store.
- During my time at FESB, I was a teaching assistant (demonstrator) for the class "Introduction to Computers and Programming."
- I have created an Android app to measure the time spent on other apps for my bachelor's degree in 2024.
- In my second year at FESB, my partner and I were recognized as one of the top groups in our Data Structures class. We developed a console-based game in C++ called "[Robot Race](#)."
- In 2021, I graduated from the School of Electrical Engineering in Split. For my high school final project, I created a Bluetooth-controlled Arduino car. During high school, I also learned graphic design online and created logos and various graphic design assets. The knowledge I acquired during that time proves valuable in my current front-end projects.

WORK EXPERIENCE

Technician, RTV productions, Split

Jun 2024 - Aug 2024

Audio equipment setup and dismantling

Teaching Assistant (Demonstrator), FESB, Split

Sep 2024 - Aug 2025

for the class "Introduction to Computers and Programming"

EDUCATION

Bachelor, FESB, Split

2024

Bachelor of Computer Science on Faculty of Electrical Engineering, Mechanical Engineering and Naval Architecture, Split (2021-2024)

Master's Degree, FESB, Split

2024

Expected graduation: 2026

SKILLS

- TypeScript
- Python
- Github
- React Native
- C/C++
- Graphic Design
